V CONCLUSION

I Introduction

FACEBOOK

One of the most popular social media applications

“ introduction ”

Social media is an internet-based form of communication. Social media platforms allow users to have conversations, share information and create web content.

II History

SIX DEGREES

While instant messaging and chat clients existed at the time, SixDegrees was unique as it was the first online service designed for real people to connect using their actual names.

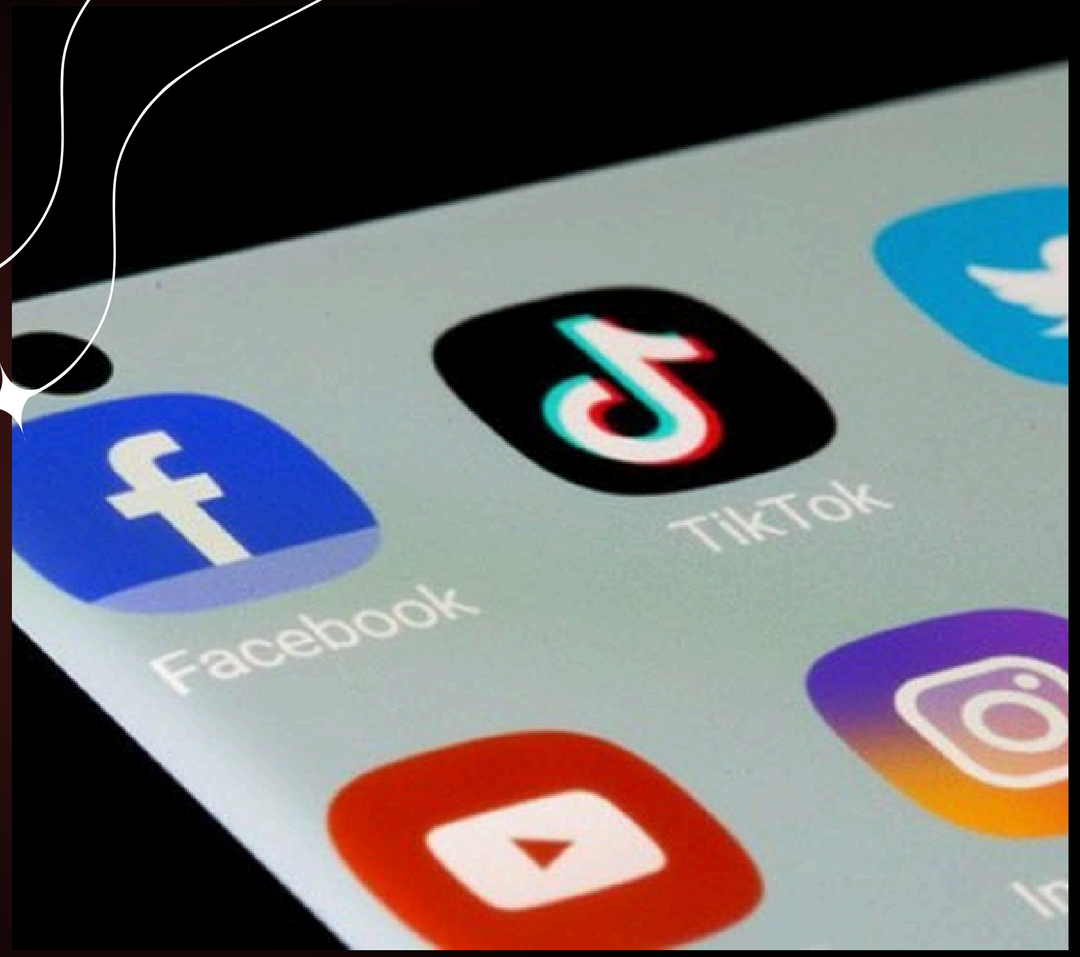

Social media started in the mid-1990s with the invention of platforms like GeoCities, Classmates.com, and SixDegrees.com.

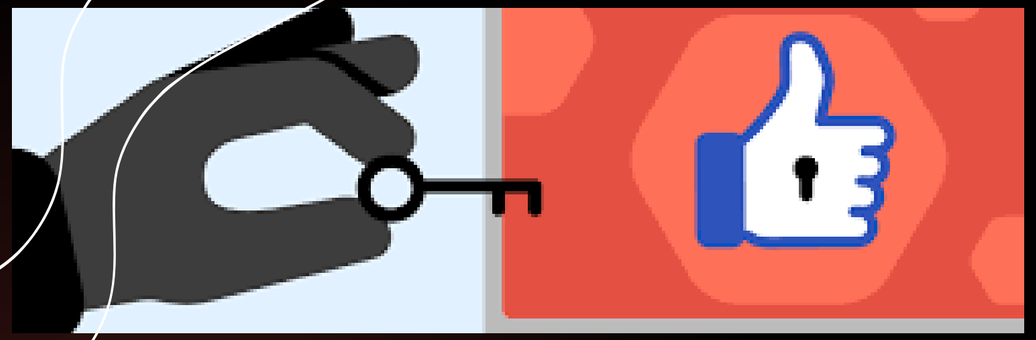

February 4, 2005: Facebook social network founded by Mark Zuckerberg was officially born. Facebook is a social networking site with the highest number of downloads and users worldwide.

III Disadvantages and advantages

“advantages”

Communicate in social media allows you to communicate with a large and diverse audience in real time, you can also get instant feedback and insights. You can create and join communities, foster dialogue and interaction, and build trust and loyalty.

“disadvantages”

When using social networks, you may have to face negative comments, criticism, complaints from your audience, you may also have to face false information, rumors or possible crises. harm your image or reputation. Not only that, if you use social networks too much, you will become addicted to it and that will directly affect you.

IV How to improve

You need to anticipate potential issues, threats, or opportunities that may arise from your social media activities, and have a response strategy and protocol in place

You need to have a clear purpose, plan, and process. You need to define your objectives, identify your audience, choose your platforms, create your content, and schedule your posts

“conclusion”

Social media has become an integral part of our daily lives, offering new opportunities for online communication, digital marketing, and social networking
